**Box 21** Oversize Material-Charts, December 11, 1918

The above material, comprising all of Box 20 and 21, relating to the State Board of Land Commissioners was discovered in May 2003 among some misfiled records. It has been processed under the same guidelines as the rest of AR 2.0011. The thirty folders in Box 20 consist of correspondence, reports, maps, and contracts relating to the various Carey Act projects in the state. The wealth of material on the Twin Falls projects – the North Side, Oakley, and Salmon River tracts – provides insights into the struggle by corporations to finish their irrigation works and provide the water to tract settlers. Folders 29 and 30 are proceedings of meetings held in Oakley, Idaho between company representatives and landholders seeking help from the State Land Board. Numerous reports from J.H. Smith, State Engineer, review company efforts to complete the irrigation works.
